

# AUTO ENTRYCONTROL™ ACCESSORIES

## Auto-IR

Presence Sensor and Door Re-Activator

## FEATURES

Auto EntryControl's™ Anti-Detect Accessory allows re-activation of door before contact is made during the closing cycle, protecting slow-moving people as well as people trailing behind. It reliably detects stationary as well as moving objects in the swing path of an automatic door. When using the Auto-Detect, mounted on the application side of the door, the need for an extended hold open time is eliminated, allowing the door to begin the close cycle after the minimum 5 second hold open time has elapsed.

- Exceeds ANSI 156.19 standards by offering a contactless experience
- Proven active infrared technology (distance measurement sensor using the principle of triangulation)
- Guarantees smooth and safe operation of a door intended to be used by the elderly and disabled people. Sensor is only active following a knowing activation such as pressing a wall switch
- Following a door activation, the Auto-Detect remains enabled to allow continued automatic non-contact re-activation capability should someone remain in the door opening while the door is open or while it is closing

## MODELS

**AUTO-IR36** Presence Sensor and Door Activator 36"    **AUTO-IR48** Presence Sensor and Door Activator 48"

## Auto-AE

PUSH Arm Extension for Revals Greater Than 8 Inches

## MODELS

**AUTO-AEX** Arm Extension for PUSH arm - Aluminum    **AUTO-AEV** Arm Extension for PUSH arm - Bronze

## SP

Spindle for Auto EntryControl™ arm

## MODELS
